

One For All

A visually light and elegant stacking chair.

Product Description

Inspired by the traditional British Windsor chair. This timeless archetype, familiar in form has been re-imagined in steel and wood using suitably modern manufacturing processes.

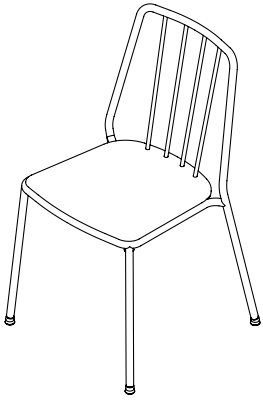

The design is effortlessly current with a gentle nod to the past, vertical rods in the back recall the Windsor chair. Refined to its simplest form, an elegant metal frame carries a plywood seat, sculpted for comfort. Dependable materials and robust construction techniques ensure the chair will endure for generations.

Conceived for both commercial and domestic environments, the relaxed character of the chair makes it the perfect companion to Piece By Piece tables.
